TO WHOM IT MAY CONCERN

A LETTER OF DECLARATION

We hereby declare that the **Automatic Cutting Machines** (with various models: TC8FR, TRUE-CUT 8, Universal 6, Universal 8, Freccia 2.5, Tecno Freccia 2.5) are entirely manufactured by FK GROUP SPA in Italy at his own factory located in Via Friuli 21, 24044 Dalmine (BG).

These machines are used in China and fully approved by the government / parties for producing medical supplies including but not limited to medical protective clothing and masks following different norms like EN149 – FFP2 or GB 19082-2009.

It's very important that FK GROUP can continue the manufacturing of Automatic Cutting Machines and exports to China, in order to avoid any stoppage in production of medical articles, so dramatically vital both for China and for all the others countries affected by COVID-19.

Yours sincerely.

In faith.

A handwritten signature in black ink, appearing to read 'Amy Yuan', written over a circular red stamp.

Amy Yuan
